Import Promotion Desk (IPD)

Cost- and risk-optimised sourcing from new markets

IPD presents 13 selected companies from Ecuador, Egypt, Ghana, Indonesia, Kenya, Morocco, Peru, Tunisia, Ukraine, and Uzbekistan offering their diverse and high-quality range of natural ingredients.

IPD is the German initiative for import promotion that connects European importers with these carefully evaluated exporters. Our goal is the sustainable and well-structured import promotion of special products from selected developing countries and emerging markets – under compliance with high quality, social and environmental standards.

We introduce exporters from our partner countries to the EU market and assist them in setting up trading relations. For European importers we open up new supply markets in the partner countries and support them in the complex purchasing process.

Reduce your initiation, negotiation and control costs with IPD. We have the contacts, information and communication channels to your new suppliers. Our services for you are neutral and **free of charge**.

All IPD companies were carefully selected and then readied by IPD to commence export to the European market. On the following pages you will find detailed information about our reliable exporters.

We establish direct contact to these new suppliers and organise b2b meetings at FIE 2023. **Get in touch with us!**

IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organisation and partner of German business. We are funded by the Federal Ministry for Economic Cooperation and Development (BMZ).

Nunalabs

IPD Joint Pavilion | 4.0F202

Nunalabs is an Ecuadorian extract pioneer company, crafting premium, plant extracts which benefit both customers and the environment. As a b2b company, Nunalabs produces top-quality plant extracts that are free from harmful chemicals. Their innovative method of producing extracts in the heart of the jungle allows them to provide you with this unique premium product to enhance the health and wellbeing of your customers.

The skilled research and development team can craft products and formulas in alignment with your aspirations. The mission? To encapsulate the plant's identity in the truest form possible in various extracts. With their wide-ranging applicability, their extracts find a place in various industries – whether it is food and beverages, cosmetics, or supplements.

Alrehab Herbs

IPD Joint Pavilion | 4.0F202

Established since 1996 within the Egyptian market and since 2012 on the international stage, Alrehab Herbs is a dedicated specialist in medicinal and aromatic plants sourced from Egypt. The distinction of this company lies in a robust and well-established supply chain that sets them apart.

Their approach encompasses the complete spectrum: Cultivation adhering to GAP and GHP standards, drying techniques encompassing both sun and advanced machine drying, processing that aligns with GMP guidelines, and packaging crafted from fresh fibers to mitigate MOSH/MOAH concerns. They predominantly serve key markets including Europe, the USA, and the Gulf region. Alrehab Herbs credentials encompass prestigious certifications such as ORGANIC (EU, NOP), FSSC 22000, KOSHER, and Sedex, underlining the commitment to quality and ethical practices.

Grow It Green

IPD Joint Pavilion | 4.0F202

Since 2020 Grow It Green is a vertically integrated agribusiness company, with recognized expertise in vegetable cultivation with a speciality in capsicum and ginger production as well as processing.

The company has an equipped dehydration and processing facility ensuring most of the work is done inhouse. Their production capacity stems from nucleus farms and more than 1,250 outgrowers located across four regions who undergo continuous training and sensitization to meet strict food safety, quality assurance and operating standards.

Grow It Green is now one of the largest exporter of dried capsicum in Ghana. During the peak season they employ around 250 people for its operations, 80% of whom are women. They recently obtained their GLOBALG.A.P certification for its farm and currently working to finalize Fairtrade certification both as a producer and for their outgrowers.

PRODUCTS & QUANTITIES PER YEAR

- + Dried capsicum (birds eye, chili, paprika) / 500t
- + Dried ginger / 20t
- + Dried coconut /20t
- + Dried mango / 20t
- + Dried pineapple / 20t

INDONESIA

Kenya Bixa

IPD Joint Pavilion | 4.0F202

Kenya Bixa commenced operations in 1979. Initially designed to process 250 tons of Bixa seeds per year, the factory has since been upgraded to a processing capacity of 3,000 tons of per year.

Kenya Bixa processes annatto seeds into annatto based natural food colorants (norbixin and bixin) and its by-products. The company is experienced with direct exports worldwide (incl. Japan, Latin America, USA, Europe).

Kenya Bixa has its own annatto farm of about 1,500 acres and about 7,000–10,000 farmers supplying Bixa orellana seeds through a contract farming scheme as well as traders. The farmers are spread across the Kwale, Lamu and Kilifi counties along the Kenyan coast.

PRODUCTS & QUANTITIES PER YEAR

Phycotek

IPD Joint Pavilion | 4.0F202

Phycotek was born of the idea that better nutrition has become essential. The farm of Phycotek has a total of 10,000 m² of greenhouse ponds to produce the highest quality spirulina possible, while ensuring total traceability for their customers and partners.

The company aims at allowing more people to benefit from the benefits of spirulina. They value their impact on the environment and use innovative approaches to cultivation. Phycotek is a 100 percent sun energy powered company for all phases of cultivation (water pumping, tank agitation, filtration and drying). Phycotek's carbon footprint is negative, thanks to its 160 photovoltaic panels.

Phycotek's mission is to provide a sustainable and regular supply of quality produce throughout the seasons to their industrial partners while ensuring total traceability, consistent quality and hygiene.

MOROCCO

Peruvian Nature

Own Pavilion | 4.1C121

**PERUVIAN
NATURE®**

Founded in 2001, Peruvian Nature is the leading Peruvian company dedicated to the production and marketing of high-quality dehydrated ingredients. These ingredients serve as raw materials for food production and manufacturing industries, as well as for direct consumer use. They are used worldwide by various industrial companies as raw materials for the production of nutritional supplements, bakery products, infusions, pet food and tablets, among others. They have developed OSS (organic sterilization system) technology and expertise, which allows them to offer products with a 100% naturally reduced bacterial load. This enables them to provide products to the global food industry that align with the specific requirements of each country. Their commitment to quality, technology, and experience is what drives Peruvian Nature to deliver differentiated and high-quality products, which are vegan, non-GMO and allergen free.

PERU

Actifs Précieux

IPD Joint Pavilion | 4.0F202

Actifs Précieux produces premium food and health ingredients made exclusively from botanicals. The company is a pioneer in supercritical fluid green technology (SFE) in Africa, applying high pressure and low temperature processes.

Actifs Précieux offers pure functional nutritional extracts, active health ingredients and tailor-made solutions from lab to industrial scale. It brings not only functional properties but also flavours. The extracts are 100% free of known or suspected toxins and are highly effective giving maximum functionality at the lowest dosage level. The company is committed to sustainable business practices advocating for ethical ingredient sourcing and environment friendly processes that are traceable and compliant with certified organic production guidelines. Actifs Précieux' CO₂ supercritical extracts have a wide range of applications in the functional nutrition, wellness, and cosmetics sectors.

TUNISIA

Dobrotrav cultivates and collects more than 70 wild species of medicinal and aromatic plants in Ukraine. The company is located in Lubny, an ecologically pure area in the Poltava region, where cultivation and collection of medicinal plants was started in the 17th century by Franciscan monks. Currently, the main export markets are Poland, Germany, the Czech Republic, Bulgaria, Albania and Moldova. The company successfully started in 2015 and exported more than 160 tons in 2022/23. Dobrotrav offers conventional and organic certified medicinal and aromatic plants.

Natur Svit

IPD Joint Pavilion | 4.0F202

Natur Svit is an Ukrainian company, which was founded in 2008 to promote authentic Ukrainian spices and herbs worldwide. Their unique and profound expertise in the production of high-quality sustainable spices and herbs combined with their long-term relationships with Ukrainian farmers creates outstanding possibilities for clients in the food processing industry.

The Ukraine-grown spices come from fertile fields straight to the modern facilities equipped with new cleaning lines, mills, a color sorting and steam sterilising machine. In addition to spices in different quality grades, Natur Svit also offers powders and essential oils made from these spices. The experienced production team can make any product adjustment to meet any client requirement.

UKRAINE

Yuma Bio is focused on the production of extracts from local natural plant material: flowers, leaves, fruits, peels, seeds, roots of medicinal plants. The current annual processing capacity of Yuma Bio is currently up to 3,000 tons of raw materials.

The main extraction shop was launched in May 2022 and currently, eight types of extracts of medicinal plants have been mastered and produced. Technological equipment allows to obtain more than 200 tons per year of dry extracts by extraction (four extractors of 6,000 liters each) and spray drying. For all steps, GMP is applied and Yuma Bio is certified FSSC 22000 since May 2023. An onsite own laboratory equipped with modern technology, as well as a pilot production, supports quality control as well as steady product development.

At present, Yuma Bio is working on deep processing of liquorice root to obtain purer components.

PRODUCTS

- + Liquorice root extract / 100t
- + Glabridin / 4t
- + Grape seed extract / 30t
- + Pomegranate peel extract / 20t
- + Elecampane root, oregano, wormwood, hawthorn extract / 20t

CERTIFICATIONS

- + FSSC 22000
